

## pTNT (Transactivation) VECTORS - BiOS Agreement

This is the Agreement governing material transfer for pTNT.Q61.3, pTNT.Q60 and pTNT.Q103 and any derivatives - BY OPENING THIS **PACKAGE OR USING THE ENCLOSED PLASMID YOU AGREE TO THESE TERMS** (a more complete explanation can be found at [www.bios.net](http://www.bios.net)):

In return for the use of these vector and any derivatives, you agree

- to allow and encourage employees and students to post on [www.bioforge.net](http://www.bioforge.net)
  - any improvements made to the technologies, and
  - safety information relevant to use of the technology and potential regulatory approval of products embodying it, and
- not to assert any intellectual property rights to the improvements and information against any others that have agreed to these conditions.

Furthermore, if you register your use of the vector on [www.bioforge.net](http://www.bioforge.net), you will be eligible to receive support and updates posted by CAMBIA and by others who have agreed to these terms and registered.

If your institution or employer requires signed copies of this Agreement, please obtain the dated signature of an authorised person at the bottom of each copy. Return two copies to CAMBIA at the address below, and CAMBIA will send one back after an authorised person at CAMBIA has signed. For licensed use by any commercial entity, information may be obtained from CAMBIA, GPO Box 3200, Canberra, ACT 2601, Australia (E-mail [licenses@cambia.org](mailto:licenses@cambia.org)).

**NOTE: You are free to distribute this plasmid and any derivative you make using it if you accompany it with a copy of this Agreement.**

Attribution: Users will describe these vectors in published and unpublished works as “pTNT.Q61.3, pTNT.Q60 and pTNT.Q103 (pCAMBIA transactivation vectors)”, and will describe any clones derived from them by stating that the clone was constructed in or using “pTNT.Q61.3”, “pTNT.Q60” or “pTNT.Q103”, “(pCAMBIA transactivation vectors)”. However, no vector derived from such cloning should retain a pCAMBIA designation, as such a designation implies development and distribution by CAMBIA and its affiliates.

In published or unpublished works, reference may be made to the Ph.D. thesis of Thach N. Trinh submitted to the Australian National University, and Published Patent Application WO 2001/021781.

Warranty Disclaimer: Components of these vectors and their use may be subject to the intellectual property rights of other parties. This material is provided without warranty of merchantability or fitness for a particular purpose or any other warranty, express or implied, and without any representation or warranty that the use or supply of the material will not infringe any patent, copyright, trademark or other right in any jurisdiction. CAMBIA and its employees and agents shall not be held liable for any use of the material transferred to you under this notice. You agree to hold CAMBIA and its employees and agents harmless for any loss, claim, damage or liability, of whatsoever kind or nature, which may arise from acceptance, use, handling or storage of the material by you.
